

Electrocardiogram (EKG) Report

Patient Information:

- **Patient Name:** Raj Pathak
- **Date of Birth:** August 12, 1967
- **Gender:** Male
- **Medical Record Number:** 202300123

Date of EKG:

- **Date of EKG:** November 8, 2023

Clinical Indication:

Mr. Raj Pathak presented with complaints of chest pain and was admitted to St. John's Medical Center on November 8, 2023. An EKG was performed to assess cardiac function and identify any potential abnormalities.

EKG Findings:

- **Heart Rate:** 72 bpm
- **Rhythm:** Sinus rhythm
- **P-R Interval:** 0.20 seconds
- **QRS Duration:** 0.08 seconds
- **QT Interval:** 0.42 seconds
- **ST-Segment:** No significant ST-segment deviations observed
- **T-Wave:** Normal
- **Axis:** Normal axis

Interpretation:

The EKG performed on Mr. Raj Pathak indicates normal sinus rhythm with no significant ST-segment deviations or other abnormalities. The P-R interval, QRS duration, and QT interval are within the normal range.

Clinical Impression:

The EKG findings do not suggest any acute cardiac abnormalities or arrhythmias. This EKG is consistent with a normal cardiac rhythm.

Recommendations:

1. Given the clinical context of chest pain, it is recommended to continue monitoring the patient's cardiac status, and further evaluations may be necessary to determine the cause of the chest pain.

2. Consultation with a cardiologist is advised for a comprehensive assessment and potential additional cardiac tests such as echocardiography or stress testing.

EKG Performed By:

- **Cardiologist:** Dr. Emily Clark
- **Date of EKG:** November 8, **2023**
- **Medical Center:** St. John's Medical Center
